POSITIONING & MANAGEMENT

This product carries excellent drought tolerance and very good agronomics. A very adaptable hybrid, it works well on both irrigated and dryland acres. Plant this hybrid with confidence in areas where green snap has been a concern. A foliar fungicide is highly recommended for corn-on-corn situations. Although the ear type is semi-determinate, you will notice a big, girthy ear with a short ear shank. Goss's Wilt tolerance is very good.
